DETAILED ACTION

Allowable Subject Matter

1. Claims 57-60, 62 and 64-74 are allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art used in the application is Thomas (US 6,832,211). Thomas performs a multivariate regression analysis on historical price data using various history price technology indicators/variables (patented technology, R&D, research sales, etc) to target valuations of a company's stock based upon their technology to identify investment opportunities in the stock market. The Thomas reference fails to suggest, as in claim 57, "...wherein said historical price data comprises data for a plurality of price-related time-dependent variables, electrically performing a multivariate regression analysis on said historical price data; and electronically calculating at said effective valuation time a fair value of said first security based on said multivariate regression analysis and on values of at least two of said plurality of price-related time-dependent variables."

As in claim 72, "electronically receiving historical market data for a plurality of financial asset market based time-dependent variables other than prices for said first security..."

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
